

So, What's new?

Two major additions to our services: **Live vision mix & recording / Real Time Encoding** and **Live Webcast** services. We also offer custom build on-demand **Video Hosting** and delivery.

Live VIDEO RECORDING

Recording and vision mix live media to hard drive is easy with our custom built production computers.

- Up to 3 x C.V. or S-Video, Y/C sources input
- 1 x VGA input or Y/C C.V. via Scan converter
- PiP and live titles presets
- Real time encoding to:
 - MPEG, MOV, MP4, WMV, M4V, F4V
- Live video/audio streaming (RTMP)
- Live "Green Screen" capabilities

You can now offer:

- Low cost and fast turnaround time
- Final result ready to go to the client instantly on a hard drive.
- Flexible file format and custom codec presets that saves on edit costs

Technology we use:

VIDEO STREAMING

Live web video streaming is the perfect way to reach your audience globally.

We offer:

- Live flash based video streaming / webcast
- iPhone and iPad support
- Slides and graphics integration
- Voting and live chat
- Custom web page coding
- Post event / on-demand webcast hosting

We utilize Wowza media systems technology with incorporation with cloud computing and CDN networks. This means we can support from just a few to thousands of viewers.

VIDEO HOSTING

Web Video Hosting and Delivery

- Media encoding for web delivery
- Dedicated web video hosting
- Custom page coding
- Slides and graphics integration
- on-demand webcasts & podcasts

We offer custom build web video hosting solutions from shared hosting to dedicated server hosting and CDN integration. From short term hosting to long term solutions.
